

KCK20B & KCKP10

INDEXABLE MILLING GRADES

For High Performance in Cast Iron & Compacted Graphite Iron

The **KCK20B** and **KCKP10** indexable milling grades have a new coating for high-performance milling, higher wear resistance and longer tool life in cast iron and compacted graphite iron applications.

EXPLORE KCK20B & KCKP10

Both grades offer higher productivity and consistent, repeatable performance during roughing, semi-finishing and finishing operations and feature a new High-Power Impulse Magnetron Sputtering (High-PIMS) coating that:

Creates a smoother insert surface and optimal layer adhesion

Increases cutting edge strength

Delivers consistent and repeatable performance and up to 30% longer tool life

Features a gold top layer for easy wear identification
